

What is Rabbit Rescue?

We rescue abused or abandoned domestic rabbits. We have them medically treated, spayed/neutered, and prepare them to be companions. We then place them in loving, indoor homes.

Through education, we improve their lives by helping people understand their fragile, sensitive, affectionate and interactive personalities.

Rabbits are the third most popular — and abandoned — pet in the US. Though we respond to hundreds of calls per year regarding rabbits in need, we're barely scratching the surface. We seek to stem the tide of more rabbits being bred and sold than there are permanent homes for them.

We're wholly and gratefully sustained by your donations.
